SPRINKLER SYSTEM

A SCIENTIFIC WAY OF IRRIGATION

We bring prosperity to your fields

DUTRON

DUTRON

SPRINKLER SYSTEM FROM THE HOUSE OF DUTRON kanaflex Suction and Delivery Hose.

- Save water
- Save Labour
- Save Electricity or Diesel
- Full protection to the fertile land
- Better yield and more profits

The common belief that flush of more water to your field can bring better crops has proved wrong - why ?

Different crops require irrigation in different ways. That means how much water for what duration and also the interval between two shots make lot of difference and this varies from crop to crop. A crop should get water only upto to the root levels. But if excess quantity of water is pumped in to a field which is uneven, then excess water logged at low lying areas can damage the crop or excess water can take away the fertility of land and all these will end up in tremendous loss of precious water and finally in poor yields.

Forget about the old style of flow irrigation, have faith in DUTRON SPRINKLER SYSTEMS - JUST GET ONE FOR YOU - A MOST SCIENTIFIC SYSTEM WHICH CAN SERVE YOU THROUGHT OUT THE LIFE.

THE SYSTEMS COMPRISES OF DUTRON H.D.P.E. PIPES with ISI mark made in technical Collaboration with **wavin** Overseas BV Netherlands. We offer sprinkler systems with 2.5 / 4 / 6 kg pipes and other accessories like sprinkler coupler, Tee Bend. End cap. PCN (pump connecting Nipple) are all made out of sprinkler pipes to ansure safety and trouble free service to our customers. Easy to fit and dismantle for any farmer on the site.

What type of Irrigation you prefer ?

Why to use costly Aluminium pipes or GI pipes which can rust quickly or Rigid PVC pipes which are weak in nature and can only be used underground as UV rays can make the pipes brittle and crack within no time ?

GO FOR

DUTRON H. D. P. E. PIPES

The one which neither crack nor bursts with highly rated back pressure, unaffected by heat or pesticides and corrosion. All pipes are fitted with male / female couplers at the ends with latches for on the spot jointing. Since all types of fittings are available, the same can be fitted and used any where in any shape within minutes. Dutron Sprinkler Systems can be used for crops like Sugar cane, Groundnut, Bajra, wheat, Cotton. Coffee, Tea, Coco, Coconut, Tobacco etc..

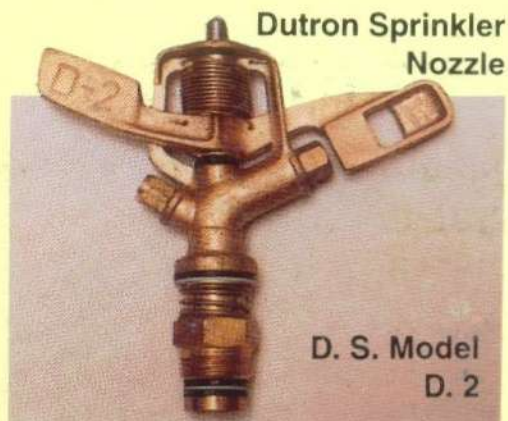

Fertilisers can also be easily administered through this system.
